**Adult F – Decision not to publish.**

The Safeguarding Adult Board have discussed that several Safeguarding Adult Reviews completed have taken much longer to complete than expected, this has meant that individual agencies and the SAB have already started to address recurring themes such as improving confidence and understanding of the Mental Capacity Act prior to the completion of a report. In addition, due to the length of time, and changing leadership of the Safeguarding Adults Board the benefit of a publication of a report has become less apparent particularly when the family have not felt it is necessary. Following discussion and agreement by the statutory partners, and assurance of actions been progressed this SAR report will not be published.
